**VICTOR® OXY-FUEL TOTE OUTFITS AVAILABLE
FOR HANDS-ON DEMOS IN TURBOTORCH'S 2017 AHR BOOTH**

Florence, S.C. –TurboTorch®, an ESAB brand, will offer hands-on demonstrations of Victor® Oxy-Fuel Tote Outfits at the 2017 AHR Expo, Las Vegas Convention Center, booth C3734. Victor, an ESAB brand, provides industry-leading oxy-fuel products, including G-Series single-stage oxygen and acetylene regulators. Victor G-Series regulators feature color-coded knobs (green for oxygen, red for acetylene) that help prevent confusion, while the knobs' ergonomic shape makes it easier to set pressure. A high-strength alloy bonnet provides nearly twice the yield strength of the previous brass bonnet. The G-Series also includes regulators for inert gas, as HVAC technicians use nitrogen to purge copper lines before brazing them, as well as to blow out condensate and debris.

Light- and Medium-Duty Outfits

Victor offers two portable Tote Outfits. The light-duty outfit features the smaller (6") J-APT handle for better maneuverability in tight spaces, while the medium-duty outfit includes the medium-sized (8.3") 100-CPT handle for working with thicker materials. The J-APT and 100-CPT handles set the industry standard for performance, safety, reliability and durability. Both torches come with check valves for enhanced safety.

Tote Outfits conveniently package every item a technician needs for Oxy-Fuel applications. The lightweight plastic carrying case features an ergonomic handle and a patented design that balances the outfit when carrying Type R oxygen and Type M fuel cylinders (outfits are available with or without

cylinders). The carrying case also includes built-in storage compartments for filler rods and the included striker, welding tips, cutting attachment, tank key, safety goggles and hoses.

ESAB Welding & Cutting Products, established in 1904, is a recognized leader in the welding and cutting industry. From time-honored processes in welding and cutting to revolutionary technologies in mechanized cutting and automation, ESAB's welding filler metals, equipment, and accessories bring solutions to customers around the globe.
