LAUNCH OF A NEW PRODUCT  
Introducing the New PoolPak IPS Series:  
The Integrated Pool System  
York, PA, January 30, 2017

PoolPak LLC, the leading manufacturer of indoor swimming pool environmental control systems, is proud to announce the latest addition to the PoolPak product line – the PoolPak Integrated Pool System (IPS) Series. Available now, the IPS Series integrates the size and dimensions of legacy systems, with the latest design innovations and product technologies. The IPS Series is constructed with features and designs that will drive the indoor pool environmental control industry for years to come.

The IPS Series is available in a variety of sizes including capacities of 30 - 90 tons, supply airflows of 10,000 to 40,000 CFM, and a variety of reduced footprint cabinet sizes. The IPS Series is designed to provide the best results in the market, with a system size that fits within the footprint of most legacy systems. The new product design of the IPS Series also allows for the Build-On-Site™ option to be available.

“The PoolPak IPS Series is a unique piece of equipment,” said Bob Paley, Vice President and General Manager of PoolPak LLC. “The combination of a reduced product size, and the ability to build the system in difficult to reach spaces, makes the IPS Series the ideal product for replacing a failing existing system.”

In addition to the improvements in the size of the system, the IPS Series features EC motor fan systems that improve the energy and environmental control performance of the system. The EC motor fans are controlled using the industry-leading ControlAir PCS™ (Programmable Control System) which features dew point environmental control, precision air flow management, and Virtual-Tech® Plus and BAS Integration.

The durable and reliable IPS Series reduces maintenance and operational costs by protecting critical components from the corrosive airstream, coating the coil systems with Electro-Guard® coatings, and featuring the WeatherGuard™ Protection Package to provide maximum protection from the elements. Each system is factory assembled and tested to ensure product quality, leading to systems that are designed to exceed the industry average system lifespan.

The PoolPak IPS Series is available for selection now with factory assistance. In the second quarter of 2017, the system will be available for selection through the newly introduced, PoolPak WAVES web-based selection software.

## About AHR Expo

The International Air-Conditioning, Heating, Refrigerating Exposition (AHR Expo), which began more than 85 years ago as a heating and ventilation show, has now grown into one of the world's largest HVACR events. The Exposition is held annually in key markets and major cities across the U.S., hosting close to 2,000 exhibitors and bringing in crowds of 60,000 industry professionals. The Show provides a unique forum for the HVACR community to come together and share new products, technologies, and ideas. The event is co-sponsored by ASHRAE and AHRI, and is held concurrently with ASHRAE's Winter Conference.
