

FOR IMMEDIATE RELEASE

***Ruskin*[®] to showcase pressure-independent automatic balancing dampers (ABDs) and variety of air control solutions at 2017 AHR Expo**

Ruskin automatic balancing dampers at 2017 AHR Expo

GRANDVIEW, Mo. – (January 1, 2017) – [Ruskin](#) will showcase its pressure-independent [automatic balancing dampers](#) (ABDs) along with other new air control products and equipment at booth C3334 during [2017 AHR Expo](#) in Las Vegas, Nevada, Jan. 30 to Feb. 1, 2017. *Ruskin* models ABD and ABD-SEA (with grille) dampers automatically regulate damper positioning for precise and automatic airflow in both supply and exhaust applications. The result is energy-saving performance that mitigates stack effect in high-rise buildings and improves comfort for building occupants.

In addition to ABDs, the *Ruskin* booth will feature a variety of notable products, including dynamic fire dampers, commercial and industrial dampers, smoke dampers, [air measuring and control](#) tools, grilles and louvers. Visitors to the booth will also see a selection of equipment

designed for heating, ventilation and air conditioning (HVAC) applications, such as energy recovery ventilators.

Interactive dynamic displays, such as a stack effect demonstrator, and other educational material will be available for attendees. *Ruskin* company experts will also be delivering a presentation on “Enhanced Technology to Improve the Accuracy of Airflow Measurement” at the AHR Expo Technology Theater on Monday, Jan. 30 at 2:15 in Theater A.

“We’re excited to bring our line of innovative products to AHR Expo and introduce them to an audience of industry professionals from around the world,” said Mark Saunders, director of sales and marketing at *Ruskin*. “Our technical team looks forward to sharing our products’ unique capabilities with attendees and speaking with them about the wide range of applications that can benefit from *Ruskin* air control solutions.”

About *Ruskin*

Acquired by Johnson Controls in 2014, *Ruskin* is a worldwide leader in manufacturing air control solutions. Backed by nearly 60 years of expert engineering and innovation, *Ruskin* is widely recognized as the most specified brand for high-performance air control solutions, including dampers, louvers, energy recovery ventilators (ERV), air measurement devices and sound control for HVAC systems. *Ruskin* products are used in commercial applications such as data centers, high-rise buildings, retail, hotels, healthcare and education facilities. In addition, *Ruskin* products can be found throughout the world’s industrial applications, such as warehouses and transportation hubs.

About Johnson Controls

Johnson Controls is a global diversified technology and multi industrial leader serving a wide range of customers in more than 150 countries. Our 117,000 employees create intelligent buildings, efficient energy solutions, integrated infrastructure and next generation transportation systems that work seamlessly together to deliver on the promise of smart cities and communities. Our commitment to sustainability dates back to our roots in 1885, with the invention of the first electric room thermostat. We are committed to helping our customers win and creating greater value for all of our stakeholders through strategic focus on our buildings

and energy growth platforms. For additional information, please visit <http://www.johnsoncontrols.com> or follow us @johnsoncontrols on Twitter.
